SUMMARY

Product Designer with 4+ years of experience delivering end-to-end UX for B2B SaaS, AI-powered platforms, and enterprise products. Known for independently driving design from research through to production — covering design systems, high-fidelity prototyping, and developer handoff. Brings a distinctive edge in AI-augmented workflows and vibe coding, enabling faster iteration, tighter engineering collaboration, and production-ready outputs. Domain experience spans legal-tech, fintech, sports intelligence, and AI/ML products.

EXPERIENCE

Product Design Manager

Leegality

May 2024 – Present

- Led end-to-end UX strategy for complex B2B document workflow and e-signature solutions, serving enterprise clients across web and mobile.
- Built and maintained a scalable design system that unified visual language across product lines and cut design-to-development handoff cycles significantly.
- Ran usability testing and stakeholder feedback loops to continuously iterate on core workflows, reducing friction on high-frequency legal tasks.
- Integrated AI agents (Claude, ChatGPT, Grok) and vibe coding into daily practice — creating prototypes, committing code via Git, and shipping closer to production quality.
- Collaborated cross-functionally with product, engineering, and QA to ensure pixel-perfect, accessible execution across every release.

UX Designer

JIO Platforms – Artificial Intelligence

Dec 2021 – May 2024

- Designed AI-powered product experiences across 5+ major projects in fintech, media, and sports intelligence — translating complex ML outputs into intuitive, accessible interfaces.
- Served as Design System Architect for the JIO Design System — defining component libraries, design tokens, and documentation standards adopted across multiple internal product teams.
- Led the full redesign of the Mumbai Indians Intelligence Platform, growing platform adoption from ~45 to 500+ active users (10× growth) across 6 global franchise leagues.
- Delivered AR design prototypes and interactive UI motion concepts that enhanced engagement across consumer-facing JIO experiences.
- Contributed across the full design lifecycle on every project — user research, wireframing, high-fidelity prototyping, responsive design, and UX writing.

FEATURED PROJECT

Mumbai Indians Intelligence Platform

JIO Platforms · Sports Analytics · Solo End-to-End Redesign

- Sole designer responsible for redesigning a legacy sports analytics tool from the ground up, used by coaching and strategy staff across MI, MI Capetown, MI Emirates, and 3 other global franchises.
- Platform adoption grew from ~45 to 500+ active users (10×) — driven by a complete overhaul of information architecture, a modernised visual system, and resolution of long-standing usability issues.
- Designed a multi-league role-switching system enabling users with different permissions across leagues to shift active context in real time — eliminating re-authentication and manual workflow changes.
- Product is in active daily use across 6 leagues for auction strategy, player performance tracking, opponent scouting, and game planning.

SKILLS

Design	UX Research · Wireframing · Prototyping · Usability Testing · Interaction Design · Visual Design · UX Writing
Tools	Figma · Framer · Rive · Adobe Suite · Blender · Figma Make · Midjourney
AI & Coding	Claude AI · ChatGPT · Grok · Emergent · Prompt Engineering · Vibe Coding · Git (branch / commit / push)
Domains	Legal-Tech · Fintech · Sports Intelligence · AI/ML Products · B2B SaaS · Design Systems

EDUCATION

Bachelor of Engineering – Electronics & Telecommunications	Jun 2021
Dhole Patil College of Engineering, Pune	

CERTIFICATIONS

Full Stack UI/UX Design	Grade A
Masai School
